

Introducing the New Restorator from Vaportek

The Superior Alternative to Ozone Cleaning

RESTORATOR
BY VAPORTEK

The Restorator uses a powerful blower and features a convenient carrying handle, as well as a superior dirt resistant finish.

RESTORATOR

The Restorator is a simple to use, portable electric device that quickly, safely, and effectively renews interior space with non-toxic technology. The Restorator uses Vaportek's patented essential oil membranes to release a non-toxic odor neutralizing dry vapor into the air. This penetrating vapor quickly controls and eliminates malodors from smoke, food, and biological odors. Based on proven technology used in fire restoration, the Restorator sets a new standard in interior space renovation.

Restorator cartridges are available in two strengths. One time, standard output variety (40 grams) - a value priced cartridge which is excellent for single use in restorator work, or for short bursts of use in car interior renovation (especially in the 12V machine). High output variety (150 grams) - excellent for tough odor contamination and repeated applications. The high output variety is rated up to 240 hours of service.

The Restorator machine is made from tough steel construction with a composite handle.

- Made in the USA • Two Year Warranty
- Available in 12V (car adapter) and 110V models
- Cartridges sold separately

- **TESTED and PROVEN** at auto detail shops.
- **Safer than ozone or chemical fogging.**
- **Unlike ozone, The Vaportek Restorator will not harm fabric, rubber, adhesives or remove pigment from leather.**
- **The Restorator will not introduce any moisture into the treatment area, eliminating possible risk of damage.**
- **The Restorator removes odors safely and quickly and requires no recovery period after treatment.**

RESTORATOR BY VAPORTEK

Introducing the New Restorator from Vaportek

The Superior Alternative to Ozone Cleaning

The Restorator is a simple to use, portable electric device that quickly, safely, and effectively renews interior space with non-toxic technology. The Restorator uses Vaportek's patented essential oil membranes to release a non-toxic odor neutralizing dry vapor into the air. This vapor quickly controls and eliminates malodors from smoke, food, and biological odors. Based on proven technology used in the medical field, the Restorator sets a new standard in interior space renovation.

The Restorator uses a more powerful blower than the Optimum series, and features a convenient carrying handle, as well as a superior dirt resistant finish to provide long service.

Easier to Use & Safer than Ozone Machines:

No need to worry about health dangers from ozone. Staff can work with the Vaportek system without special safety equipment required when using ozone machines.

Does not oxidize fabric or remove pigment from leather. The Vaportek system is gentler on fabric and materials than ozone.

Fast performance requires no recovery period after treatment.

Special Features of the Restorator and Membrane Cartridge System

The Machine:

- Tough steel construction with composite carrying handle.
- Powerful, internal blower, illuminated on-off switch.
- Spring Mounted rear access cover with lanyard.
- 110V configuration.
- Made in USA. 2 Year Limited Warranty.

The Vaportek Odor Neutralizer Cartridge System:

- Totally enclosed and sealed dry vapor system: leakproof.
- Uses the power of natural essential oils to permanently control odors.
- Works instantly, penetrates all porous surfaces.
- Cartridges available in two strengths (standard and high output) for different odor control needs.
- Proven worldwide in millions of applications in the medical and hospitality fields.
